Bill -

As I explained to Tom, the communication is best done through Jon Schaefer or myself at this point. That said, while we were sorry to hear that none of the mid-August dates worked for you, we are continuing to work on schedules related to August 4. As soon as we have confirmation (one way or the other), Jon or I will get back to you.

Best,

Earl

Earl and Jon:

I just left Jon a voice mail message regarding scheduling a site visit.

I would like to coordinate with someone from SIMs in order to develop a mutually agreeable date for a visit at the plant in Johnston.

Tom Olivier had some correspondence with you and as of late, it looked like the Aug 4 may be opening up a little. I would like to see how that is working out. I think Tom agreed that it would be more efficient if I work with someone at the plant to set up a visit.

I am sorry but at this point, I am booked for Aug 11 and 18. We are in our busy period of field testing and consequently, I am tied up for those dates.

We do have some flexibility for the first week of August. I could do Aug 4, 5 and or if needed Aug 6. Mike Looney is available to attend with me on Aug 5 which makes that date a better selection (if there is a choice). If not, I can attend any of those 3 dates with only minimal movement of my field schedule.

What we would like to do is look over the plant, during a higher level of throughput, in order to get an idea of how best to comment on some of your potential enclosure options. We would work with plant representative in order to discuss some of test conditions and setup. Additionally, we have an infrared camera that may be of great assistance in qualifying fugitive emissions from the plant. It can show if and where emissions can occur. All of this cooperative effort is really to assist SIMs in developing a working protocol for the EPA test.

Can I coordinate with Brian Sackett or is there someone else you recommend?

If possible, it would be best to nail down a date by the end of this week.

Thank you.

Bill Osbahr

Tom -

If those dates don't work, then the best person to reach for scheduling is Jon Schaefer at 860-275-8349. Brian is often traveling and out of the country.

Best,

Earl

I'll forward those dates to Bill Osbahr. Is it all right with you if he calls Brian Sackett (if that's the right person)?

Tom?

I know that the August 4 date doesn't work, but wondered if August 11 or 18 might work?

Earl and Jon: Bill Osbahr can't make it on August 13. He proposes August 4. If that doesn't work on SMM's end, I suggest that Bill work directly with the appropriate contact to find a date. Would that be Brian Sackett?

Thank you,

Tom
